

Materialcontrolling-Services

In coherence with *ELV - International Materialdata System IMDS* and themes like Materialcontrolling, Lifecycle Assessment and IPP with data-management, we are your partner. You will be supported in all involved departments. Coaching, data input, researches, controlling, declarations, sending, follow up, etc. is our daily business! You will no longer be alone, to get the money from your customer. You will profit with our contacts! SDI works in the automotive industry since 1993.

*Dr. Thomas A. C.
Schaumburg
general manager*

For your convenience we've created Service Modules.

Service Module C complete data input, research, follow up (most common!)

We create semi materials and do the necessary researches. Also, we contact your supplier and customer where reasonable. We compose the materials, you use in your company.

We create, mark the electronic parts, the plastics, the metals etc. and do ALL the things to get your part accepted!

We will accept or reject the received parts of your supplier in conjunction with the actual recommendations.

In strong cooperation with the producers of materials and the OEMs we know the best and efficient ways.

Only if reasonable we work at your location.

Service Module B complete Outsourcing

With a service agreement we will work as your IMDS department. You do not need to create the knowledge for the IMDS System.

Service Module A Systemintegration

You create with our support the complete data recording in your systems. You will get data analysis based on your existing computer system in coherence with the necessities of the IMDS System.

Audit - Advisory - IMDS

If you are still listed and registered supplier often depends on the rating of your customer. Are you sure, you implemented and kept records in the correct way? We also will not leave you! You might get our load of competency.

Coaching

Coaching at your location / training on the job is the most effective way to do the work your own. We will assist you, that you can do your work.

Materialcontrolling

Materialcontrolling is the best way for the actual and future rules by law. Whatever the European Community, the Chinese, the Japanese, the US government will create new reglementations for the environment, YOUR enterprise will be prepared! In addition with materialcontrolling you are able to save up to 43% of costs! In words: **Savings up to forty three percent!**
